Music in Contemporary Philosophy Martin Scherzinger, 2016-01-08 This book examines the functional place of music in contemporary European philosophy of the 20th and 21st centuries The chapters explore the musical dimensions of lesser known figures as well as well known philosophical figures in relation to their lesser known musical dimensions Edmund Husserl Martin Heidegger Jean Fran ois Lyotard Jacques Ranci re and Alain Badiou for example are central figures in debates concerning phenomenology postmodernism and political philosophy Their musical writings however have been largely overlooked Of those discussed here whose musical writings have gained some currency Ernst Bloch Theodor W Adorno Jean Luc Nancy Edward Said and Slavoj i ek music mostly constitutes but a partial aspect of their overall philosophical output These chapters attempt to supplement the gap raising more prominently than hitherto the question concerning music in this philosophical milieu The collection represents some of the distinctive recent work of an emerging generation of American based music scholars tackling the relationship between philosophy and music in a qualitatively new way While this intellectual output cannot be easily summarized one detects certain features If what was once called New Musicology in the 1990s can be characterized by a turn to literary theory and philosophy treated as sources of mostly nonjudgmental inspiration we find here instead a new body of work that turns the tables on the relation between music and philosophy Instead of bringing philosophy to musicology this work critically analyzes how music inhabits philosophy itself and then assesses the ethical and political dimensions of these philosophical positions and their relation to lived history This book was originally published as a special issue of Contemporary Music Review

Music and Humanism R. A. Sharpe, 2000 Is music sad because it causes the listener to feel sad Is it to be valued because of the pleasure it gives us R A Sharpe argues that the views these questions enshrine underestimate the cognitive element in our response to music Our beliefs about music and our knowledge of the culture in which it originated underlie the judgements

we make At their most general these cognitive elements are ideological in nature and they play both a positive and a negative role in our response to music they both help and hinder Music has long been thought of as a language This metaphor underpins the way we hear music and the way we think about it We conceive of music both as expressive and as something to be understood Almost certainly the roots of this conception lie in the fertilization of music by rhetoric during the Renaissance Sharpe suggests that music may have entered a new period in which the language analogy and the humanist conception of music which it expresses are becoming less and less appropriate
