Graves And Burial Practices In Israel In The Ancient Period:

A History of Death in the Hebrew Bible Matthew Suriano, 2018-04-02 Postmortem existence in the Hebrew Bible Old Testament was rooted in mortuary practices and conceptualized through the embodiment of the dead But this idea of the afterlife was not hopeless or fatalistic consigned to the dreariness of the tomb The dead were cherished and remembered their bones were cared for and their names lived on as ancestors This book examines the concept of the afterlife in the Hebrew Bible by studying the treatment of the dead as revealed both in biblical literature and in the material remains of the southern Levant The mortuary culture of Judah during the Iron Age is the starting point for this study The practice of collective burial inside a Judahite rock cut bench tomb is compared to biblical traditions of family tombs and joining one's ancestors in death This archaeological analysis which also incorporates funerary inscriptions will shed important insight into concepts found in biblical literature such as the construction of the soul in death the nature of corpse impurity and the idea of Sheol In Judah and the Hebrew Bible death was a transition that was managed through the ritual actions of the living The connections that were forged through such actions such as ancestor veneration were socially meaningful for the living and insured a measure of immortality for the dead

Social Inequality in the World of the Text Saul M. Olyan, 2011-09-14. This volume consists of fifteen of the author's essays, including two that have never been published before. The essays date to the last decade and a half and all reflect in some manner the author's ongoing interest in literary operations of classification and their social implications, particularly the production of distinctions which create social inequality in the world of the text and have the potential to generate hierarchical social relationships in contexts where biblical texts might have had an impact on real people. In these essays, the author explores themes such as gender, sexuality, purity, and pollution, sanctification, death, and afterlife, foreignness, and disability, with particular attention to the roles, distinctions such as honored/shamed, feminine/masculine, mourning/rejoicing, unclean/clean, alien/native, play in creating and perpetuating social differences in texts. Rites of status change such as circumcision, shaving, purification, burial, or disinterment, sanctification, and profanation of holiness are a focus of interest in a number of these essays, reflecting the author's ongoing interest in the textual representation of ritual. Most of the essays examine texts in their historical setting, but several also engage the early history of the interpretation of biblical texts, including the phenomenon of inner-biblical exegesis. The essays are divided into five sections: Rites and Social Status, Gender and Sexuality, Disability, Holiness, Purity, the Alien, Death, Burial, Afterlife, and their Metaphorical Uses. The author introduces each of the sections, contextualizing each essay in his larger scholarly project, reflecting on its development and reception, and in some cases responding to his critics.

Israel Museum Studies in Archaeology, 2006. *The Historical Impact and Archaeological Reflections of Intense Religious Movements* Yoav Arbel, 2005. *The Necropolis of Jerusalem in the Second Temple Period* Amos Kloner, Boaz Zissu, 2007. Burials from the Second Temple Period, that is, the Late Hellenistic, Hasmonean, and the Early Roman/Herodian Periods, were revealed in all the areas surrounding Jerusalem, the central city of the period. These burial caves, mainly family

tombs were hewn in a necropolis completely surrounding the city and more than a dozen times its area. The consequences of this study have enabled the authors to map the burial fields that make up this necropolis, one of the most intensively studied in the archaeology of the Levant. Approximately 900 family tombs and 60 individual graves were hewn in a ring about 4 km around the city. An additional 100 burial caves were hewn within the present-day municipal area of Jerusalem but are not discussed here because they lie outside this belt and belonged to neighboring villages of the period. Since the 19th century all the relevant findings from these burials were meticulously documented according to various categories: architectural elements, the majority of which are carved in the rock; ossuaries and sarcophagi; pottery; glass vessels; stone vessels; coins; personal belongings; human bones; and more. Inscriptions and names generally inscribed on the sides of ossuaries give a voice to these silent findings and reveal the personalities of the Jews who lived in the city and participated in its design and history. This interdisciplinary approach, incorporating many branches of study, weaves a colourful picture that enables us to understand the burial customs of the period and sheds light on the city and its inhabitants. The authors collected, summarized, and discuss this large body of information, the product of intensive field work by hundreds of archaeologists and other scholars who excavated the tombs, collected the data, and documented the finds connected to the burials and burial customs of the inhabitants of Jerusalem in the Second Temple Period.

Death in the Iron Age II and in First Isaiah Christopher B. Hays, 2011. Death is one of the major themes of First Isaiah, although it has not generally been recognized as such. Images of death are repeatedly used by the prophet and his earliest tradents. The book begins by concisely summarizing what is known about death in the Ancient Near East during the Iron Age II, covering beliefs and practices in Mesopotamia, Egypt, Syria, Palestine, and Judah, Israel. Incorporating both textual and archaeological data, Christopher B. Hays surveys and analyzes existing scholarly literature on these topics from multiple fields. Focusing on the text's meaning for its producers and its initial audiences, he describes the ways in which the rhetoric of death functioned in its historical context and offers fresh interpretations of more than a dozen passages in Isa 5:38. He shows how they employ the imagery of death that was part of their cultural contexts and also identifies ways in which they break new creative ground. This holistic approach to questions that have attracted much scholarly attention in recent decades produces new insights not only for the interpretation of specific biblical passages but also for the formation of the book of Isaiah and for the history of ancient Near Eastern religions.
