Footprint Wales:

The Ecological Footprint Andrea Collins, Andrew Flynn, 2015-05-29 The ecological footprint is one of the most prominent tools used to measure environmental sustainability and its rise in academic and policy debates since the early 1990s has been remarkable Drawing upon research and examples from around the world t [Making One's Way in the World](#) Martin Bell, 2020-02-28 The book draws on the evidence of landscape archaeology palaeoenvironmental studies ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable The premise is that archaeologists tend to focus on sites while neglecting the patterns of habitual movement that made them part of living landscapes Evidence of past movement is considered in a multi scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning animal movement faeces deposition and transplantation which can create readable routes along which are favoured resources Evidence from European hunter gatherer sites hints at similar practices of niche construction on a range of spatial scales On a local scale footprints help to establish axes of movement the locations of lost settlements and activity areas Wood trackways likewise provide evidence of favoured patterns of movement and past settlement location Among early farming communities alignments of burial mounds enclosure entrances and other monuments indicate axes of communication From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long term continuity of routeways Where fields flank routeways a range of methods including scientific approaches provide dates Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways and generally considered as early medieval can be shown to be of prehistoric origin One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance communication It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of

connectivity between different landscape zones including fragmented nature reserves and valued places In these ways an understanding of past routeways can contribute to sustainable landscapes communities and quality of life

Local Sustainable Urban Development in a Globalized World Susan M. Opp,Lauren C. Heberle,2016-05-06 Sustainable development is a key issue of concern to urban planners across the globe How it is defined implemented and measured at the local level remains highly contested and subject to a wide range of external cultural political and economic pressures

Bringing together leading experts from North America Europe the Middle East and SE Asia this book provides a timely overview of the various methods for understanding and implementing sustainable practices at local levels In doing so they present the wide range of local action alternatives available to planners that may be pursued in spite of the constraints generated by globalization processes and highlight the array of public policy options that could reduce the external pressures shaping the possible local alternatives The book argues that while local planners and local authorities are willing to act many are unaware of the range of options available to them In bringing together these case studies not only diverse in geographic terms but also reflecting very different levels of income general population education cultural norms legal systems and government structures it points out innovations and examples of best practice [#futuregen](#) Jane Davidson,2020-06-04

What Wales is doing today the world will do tomorrow Nikhil Seth UN Assistant Secretary General The story of how one small nation responded to global climate issues by radically rethinking public policy for future generations In futuregen Jane Davidson explains how as Minister for Environment Sustainability and Housing in Wales she proposed the Well being of Future Generations Wales Act 2015 the first piece of legislation on Earth to place regenerative and sustainable practice at the heart of government Unparalleled in its scope and vision the Act connects environmental and social health and looks to solve complex issues such as poverty education and unemployment Davidson reveals how and why such groundbreaking legislation was forged in Wales once reliant on its coal iron and steel industries and explores how the shift from economic growth to sustainable growth is creating new opportunities for communities and governments all over the world futuregen is the inspiring story of a small pioneering nation discovering prosperity through its vast natural beauty renewable energy resources and resilient communities It s a living breathing prototype for local and global leaders as proof of what is possible in the fight for a sustainable future
