web multimedia Topics include Flash as a platform for developing animation and the Flashimation aesthetic its capacities for scripting and interactive design games and genres enabled by the reconstruction of the browser as a games portal forms and genres of media art that use Flash and Flash s stance on openness and standards including its platform defining battle over the ability to participate in Apple s own proprietary platforms Flash s exit from the mobile environment in 2011 led some to declare that Flash was dead But as Salter and Murray show not only does Flash live but its role as a definitive cross platform tool continues to influence web experience
