Gangesbrahmaputrameghna Region A Framework For Sustainable Development:

Ganges-Brahmaputra-Meghna Region Qazi Kholiquzzaman Ahmad,2001 This Book Makes A Strong Plea For An Integrated Holistic Approach To The Development Of The Region Beginning With Water Resources The Abundance Of Water In The Gbm Ganga Brahmaputra Meghna Region As A Shared Resource Can Serve As The Principal Agent Of Development Fo The Millions Of People Living In The Region *The Ganges Water Diversion: Environmental Effects and Implications* M. Monirul Qader Mirza,2006-02-03 This book deals with environmental effects on both sides of the border between Bangladesh and India caused by the Ganges water diversion This issue came to my attention in early 1976 when news media in Bangladesh and overseas began publications of articles on the unilateral withdrawal of a huge quantity of water from the Ganges River through the commissioning of the Farakka Barrage in India I first pursued the subject professionally in 1984 while working as a contributor for Bangladesh Today Holiday and New Nation During the next two decades I followed the protracted hydro political negotiations between the riparian countries in the Ganges basin and I traveled extensively to observe the environmental and ecological changes in Bangladesh as well as India that occurred due to the water diversion The Ganges one of the longest rivers of the world originates at the Gangotri glacier in the Himalayas and flows across the plains of North India Eventually the river splits into two main branches and empties into the Bay of Bengal The conflict of diversion and sharing of the Ganges water arose in the middle of the last century when the government of India decided to implement a barrage at Farakka to resolve a navigation problem at the Kolkata Port **Management of Transboundary Rivers and Lakes** Olli Varis,Cecilia Tortajada,Asit K. Biswas,2008-03-15 Transboundary rivers and lakes are often the remaining new sources of water that can be developed for human uses These water sources were not used in the past because of the many complexities involved Written and edited by the world s leading water and legal experts this unique and authoritative book analyses the magnitudes of the transboundary water problems in different parts of the world It also examines difficulties and constraints faced to resolve these problems *Vulnerability and Adaptation to Climate Change in Bangladesh* Md Aboul Fazal Younus,2014-06-26 The IPCC 2007 warned that the Ganges Brahmaputra Meghna GBM basin will be at greatest risk due to increased flooding and that the region s poverty would reduce its adaptation capacity This book investigates autonomous adaptation using a multi method technique comprising PRA and a questionnaire survey applied in the case study area Islampur Upazila in Bangladesh The study has four key approaches First it reviews the flood literature for Bangladesh from 1980 to 2014 Second it examines farmers crop adaptation processes in a case study area at Islampur Bangladesh Third it assesses the vulnerability and adaptation V 2 methodological contribution for assessing vulnerability and adaptation through PRA and 3 the economic consequences of the failure effects of autonomous crop adaptations This book provides a good account of autonomous adaptation and its impact on fl ood vulnerable communities in Bangladesh Anyone wishing to fully understand the impact of climate change should read the book Professor Muhammad Yunus Nobel Laureate

Yunus Centre Bangladesh **Sustainable Development of the Ganges-Brahmaputra-Meghna Basins** Asit K. Biswas, Juha I. Uitto, 2001 The Ganges Brahmaputra Meghna basin contains the largest number of the world's poor in any one region. The population is increasing steadily and unless the current development trends are broken poverty will become even more pervasive. The region is endowed with considerable natural resources that could be used to foster sustainable economic development. Water could be successfully used as the engine to promote economic development of the region which has been hindered because the most populous part of the basin is shared by three countries: Bangladesh, India, and Nepal, who have in the past been unable to agree to an integrated development plan. In *Sustainable Development of the Ganges Brahmaputra Meghna Basins*, leading technocrats and intellectuals discuss how, through cooperation between the countries concerned and by taking a holistic development approach, the quality of life of the people of the basin could be improved significantly within a reasonable timeframe.

Free flow UNESCO, 2013-10-17 Water is an essential resource for mankind and our ecosystems. *Free Flow* is a fully illustrated book with over 100 authors' work on water management and cooperation at international, regional, national, municipal, and local levels. Their commentaries draw upon experiences around the world, reflecting how people are changing their interaction with water to improve sustainable development. The publication reflects progress and challenges in these fields, highlighting good practices in a wide variety of societies and disciplines. The book strives to project experiences into future actions and encourages further institutional commitments to better understanding of and more effective management of water cooperation in order to achieve sustainable development.

[Asian Perspectives on Water Policy](#) Cecilia Tortajada, Asit Biswas, 2013-09-13 Asian countries are not homogenous. They are in different stages of social and economic development with cultural conditions and institutional and legal frameworks varying from one country to another. Therefore, how water can be successfully managed differs from one country to another. The book provides authoritative analyses of how water is being managed in different Asian countries, ranging from the world's most populous countries like China and India to a city state like Singapore and an island country like Fiji. It also analyses in depth several wide-ranging issues like terrorism, human rights, water-energy nexus, and roles of media, along with comprehensive discussions of legal, institutional, and regulatory frameworks in an Asian water management context. The overall focus is on how water can be managed efficiently, cost-effectively, and equitably in various Asian countries. This book was based on a special issue of the *International Journal of Water Resources Development*.

[Freshwater Governance for the 21st Century](#) Eiman Karar, 2016-10-24 The objective of this book is to broadly illustrate the key aspects of water governance, mapping the spectrum of decision-making from techno-centric and eco-centric approaches to hybrid concepts and people-centric approaches. Topics covered include the challenges for water governance models, the polycentric model, the integration challenge, water in the decision-making hierarchy, and the rise of water-sensitive design, while also taking into account interdependencies between stakeholders as well as the issue of scale. The book's content is presented in an integrated and

comprehensive format building on detailed case studies from around the world and the authors working experiences in the water sector Combining essential insights with accessible non technical language it offers a valuable resource for academics technicians and policy makers alike

Review of Protected Areas and Development in the Four Countries of the Lower Mekong River Region Protected Areas and Development Partnership,2003 *Integrated Water Resources Management in South and South East Asia* Asit Biswas,Olli Varis,Cecilia Tortajada,2005 The book analyzes to what extent Integrated Resource Management has been applied to improve water management practices and processes in South and Southeast Asia It is based on a series of comprehensive case studies which were prepared by leading authorities from Bangladesh India Malaysia Nepal Thailand and Vietnam as well as for the Mekong River as a whole *Bangladesh Climate Change Impacts and Vulnerability* Ahsan Uddin Ahmed,2006 Securing Sustainable Livelihoods in the Hindu Kush-Himalayas Pema Gyamtsho,Anupa Lamichhane,2006 **Journal of the United Service Institution of India** United Service Institution of India,2002 **Rethinking Water Management** Caroline Figuères,Johan Rockström,Cecilia Tortajada,2003 Table of contents **State, Natural Resource Conflicts and Challenges to Governance** N.
