Harris, 2014-05-24 Mathematics for Physical Science and Engineering is a complete text in mathematics for physical science that includes the use of symbolic computation to illustrate the mathematical concepts and enable the solution of a broader range of practical problems This book enables professionals to connect their knowledge of mathematics to either or both of the symbolic languages Maple and Mathematica The book begins by introducing the reader to symbolic computation and how it can be applied to solve a broad range of practical problems Chapters cover topics that include infinite series complex numbers and functions vectors and matrices vector analysis tensor analysis ordinary differential equations general vector spaces Fourier series partial differential equations complex variable theory and probability and statistics Each important concept is clarified to students through the use of a simple example and often an illustration This book is an ideal reference for upper level undergraduates in physical chemistry physics engineering and advanced applied mathematics courses It will also appeal to graduate physicists engineers and related specialties seeking to address practical problems in physical science Clarifies each important concept to students through the use of a simple example and often an illustration Provides quick reference for students through multiple appendices including an overview of terms in most commonly used applications Mathematica Maple Shows how symbolic computing enables solving a broad range of practical problems Microfluidics Bastian E. Rapp, 2022-10-07 Microfluidics Modeling Mechanics and Mathematics Second Edition provides a practical lab based approach to nano and microfluidics including a wealth of practical techniques protocols and experiments ready to be put into practice in both research and industrial settings This practical approach is ideally suited to researchers and R D staff in industry Additionally the interdisciplinary approach to the science of nano and microfluidics enables readers from a range of different academic disciplines to broaden their understanding Alongside traditional fluid transport topics the book contains a wealth of coverage of materials and manufacturing techniques chemical modification surface functionalization biochemical analysis and the biosensors involved This fully updated new edition also includes new sections on viscous flows and centrifugal microfluidics expanding the types of platforms covered to include centrifugal capillary and electro kinetic platforms Provides a practical guide to the successful design and implementation of nano and microfluidic processes e g biosensing and equipment e g biosensors such as diabetes blood glucose sensors Provides techniques experiments and protocols that are ready to be put to use in the lab or in an academic or industry setting Presents a collection of 3D CAD and image files on a companion website **Biomedical Engineering, Trends in Electronics** Anthony Laskovski, 2011-01-08 Rapid technological developments in the last century have brought the field of biomedical engineering into a totally new realm Breakthroughs in material science imaging electronics and more recently the information age have improved our

understanding of the human body As a result the field of biomedical engineering is thriving with new innovations that aim to improve the quality and cost of medical care This book is the first in a series of three that will present recent trends in biomedical engineering with a particular focus on electronic and communication applications More specifically wireless monitoring sensors medical imaging and the management of medical information *Intelligent Computer Mathematics* James H. Davenport, William M. Farmer, Florian Rabe, Josef Urban, 2011-07-18 This book constitutes the joint refereed proceedings of three international events namely the 18th Symposium on the Integration of Symbolic Computation and Mechanized Reasoning Calculemus 2011 the 10th International Conference on Mathematical Knowledge Management MKM 2011 and a new track on Systems and Projects descriptions that span both the Calculemus and MKM topics all held in Bertinoro Italy in July 2011 All 51 submissions passed through a rigorous review process A total of 15 papers were submitted to Calculemus of which 9 were accepted Systems and Projects track 2011 there have been 12 papers selected out of 14 submissions while MKM 2011 received 22 submissions of which 9 were accepted for presentation and publication The events focused on the use of AI techniques within symbolic computation and the application of symbolic computation to AI problem solving the combination of computer algebra systems and automated deduction systems and mathematical knowledge management respectively

Computer Algebra Recipes for Mathematical Physics Richard H. Enns, 2006-03-20 Over two hundred novel and innovative computer algebra worksheets or recipes will enable readers in engineering physics and mathematics to easily and rapidly solve and explore most problems they encounter in their mathematical physics studies While the aim of this text is to illustrate applications a brief synopsis of the fundamentals for each topic is presented the topics being organized to correlate with those found in traditional mathematical physics texts The recipes are presented in the form of stories and anecdotes a pedagogical approach that makes a mathematically challenging subject easier and more fun to learn This is a self contained and standalone text using MAPLE that may be used in the classroom for self study as a reference or as a text for an online course
