

ECOLOGICAL STABILITY AND SUSTAINABILITY

- Living systems maintain some degree of stability through constant change in response to environmental conditions through:
 - **Inertia** (persistence): the ability of a living system to resist being disturbed or altered.
 - **Constancy**: the ability of a living system to keep its numbers within the limits imposed by available resources.
 - **Resilience**: the ability of a living system to bounce back and repair damage after (a not too drastic) disturbance.

Ecological Stability

Michael Hoelscher

Ecological Stability:

When somebody should go to the book stores, search foundation by shop, shelf by shelf, it is really problematic. This is why we give the books compilations in this website. It will unconditionally ease you to see guide **Ecological Stability** as you such as.
