

Feminism and Nursing

*Can nursing afford to remain aloof
from the women's movement?*

ROSE L. CHENE + CHARLENE ELLENOR WOODLEY

ROSE L. CHENE, B.A., M.P., is a graduate student at the University of Illinois, Urbana-Champaign, and M.S. is a student of epidemiology, also at Illinois.

The relationship between nursing and feminism is obvious. The profession has been closely associated with the women's movement, and with the concepts, nursing theories, and the professional social thinking and social thinking. However, nurses have not begun to recognize the effects of women on nursing and women health care consumers and to recognize nursing and women's health from a feminist perspective.¹ There are important interrelationships between social nursing, early nursing leaders, independent nursing social perspectives in their time, writing, and work. Nursing, traditionally a woman's occupation, has been able to gain a better understanding of feminist theory, which provides a basis of reference for examining nursing from a historical, political, and personal point of view.

Feminist Theory: What It Is

Feminism can be defined as a social view that takes women and their interests seriously (includes issues on gender). Feminist critique and feminist analysis can be found in women's writing since the early 1900s. Although much of the scholarly writing done by white women has been lost or dismissed, what has survived includes a collection of writings, although self-contradictory.² These writings and theories may refer to nursing leaders and authors such as Nightingale, Hall and Deegan, who are recognized by female scholars as reflective, respectable feminist thought.

Contemporary feminist theory began to emerge in the late 1960s as the women's movement evolved along with the civil rights and peace movements of the 1950s and 1960s. Like many of the early feminist women, feminist thinking is based on the assumption that women are oppressed, and that the

oppression of women in society is a direct result of patriarchal domination and oppressive power.

There are two major philosophical approaches to feminism: *liberal* and *radical*. The liberal feminist view, which was the earliest to emerge, has strong roots in the feminist theories of the 1900s. This view encompasses equality of opportunity for women and stresses equal distribution of wealth, justice, and power based on family, race, and sex. Liberal feminists do not object to the idea of hierarchy and neither put an end to it, nor to the patriarchy, social and economic inequalities that channel women into lower roles. In the liberal point of view, women's oppression stems from a lack of equal and equal and educational opportunities. From the perspective, oppression can be overcome by providing equal rights and opportunities for women that are equal to those of men.

Radical feminist theory identifies the origins of women's oppression in the institutional patriarchy concept. Female ownership of property encompassed individual values and constituted a class system from which women derived. Women are oppressed because the property of males, not as did medieval periods and the nature of patriarchy. Capitalism is viewed as having created a complex social and economic class for women, which is maintained primarily through continuous exploitation of women's labor in the family, industry, and institutions. Radical feminists believe that in order to eliminate capitalism and the resulting class society, there must be a societal revolution to return the ownership of property and the means of production to society as a whole.

Radical feminist theory with a class analysis of cultural institutions such as the patriarchal family, motherhood, femininity, and consciousness—all of which are seen as playing a major role in the oppression of women, but operating differently within different classes. Radical feminists focus on an analysis of the patriarchal problems of working class women and women of color;
